

Survivors: The best online game

Introduction:

A nuclear war took place in the past and now most of the earth is uninhabitable. Many regions now are destroyed and aren't anymore suitable for living. One third of the population only have survived the nuclear war and trying to build a new community. They didn't lose hope and they have faith that earth will be full of peace. They believe that there is a space for everyone to live on this planet.

Human beings have proven themselves before, they were capable to adapt to their environments. The ability to make and use tools, make fire and control it, and finding shelter to be safe from danger and/or sleep. That was how the first humans lived on earth.

As Albert Einstein said: "Peace cannot be kept by force; it can only be achieved by understanding", these people are going to ally with each other to build a new community full of understanding, peace, and love.

Are you going to help building a new community? Are you going to give hope to others and help the human race to live together peacefully? Well what are you waiting for sign up and create your account to start this lovely journey either by playing online with others or by following the Story Mode.

StoryMode:

Chapter 1: Fallout

After the nuclear war took place in the world, people now are all in a place called the island. It's the only safe zone and far away from radiation and the only place to start up the new community. However, the island is full of mysteries and people must face challenges to achieve their goals.

You are now on this island searching for something to eat guessing that you are all alone.

On your way searching for food, you meet a guy called Smith and three other armed members. You are scared and you try to ignore them but Smith approach you and greet you with a

surprise on his face. Smith: "Hello stranger, my name is Smith how did you come to this island and how did you survive the nuclear war?"

Now you have two options whether you continue this conversation or ignore him and continue your path all alone.

Hello Smith, my name is Marcus and I survived the nuclear war by hiding in a fallout shelter that I made under my house, after this apocalyptic event ended up I was surprised that I find everything is burned to ashes and no one survived. I heard on the radio station that the island is still safe and announcing if anyone is still alive to evacuate immediately to the island.

Hello Smith, I am busy right now maybe we can talk later on.

If you choose to take the first option Smith will be astonished and offer you to join his community since he finds you to be a wise man and maybe you can help them build better community. Else if you choose the second option you will continue your path all alone. You will face a monster and you fight him and try to kill him eventually you will lose all your health points and end up killing you then game over.

If first option is chosen, Smith will reply: "Wow, you are a genius. You managed to survive this apocalyptic war good for you! Me and some other people also managed to survive the nuclear warfare but our community needs help, some monsters are bothering us and killing everyday one of us we are trying to stop them but they are extremely dangerous. Can you join us and start planning to end this up and make this place our home?"

You have two choices whether to accept his offer or decline.

Ofcourse, let us build a community full of love and peace and let us stop these monsters.

Hell no, leave me alone I don't want to die.

If you choose the first option Smith will introduce you to the new community and you will move to the next chapter. He will give you a small tutorial to explain to you what are your variables. First he will show you that you have energy and health points. Initially you have %100 health points and %100 energy. If you lost all your energy the health point will decrement every while end up losing all your health points and then you die. So food is very important to keep your energy %100. Everytime you make an effort you will lose energy then food is required to boost up your energy. Also food is required to gain more health points if any monster attacks you and you lose health points. Smith will also show you that you have several skills that you can train such as attacking,defending, ranged attack, fishing, woodcutting and mining skills. If you

decided to decline his offer eventually you will face a monster on your way and the monster will defeat you and game over.

Chapter Two: The Rise of Humans

Smith ask you to choose what you prefer whether to be a ranger or a warrior. So you will focus on your upcoming choice.

Smith: "Which fighting skill you prefer to focus on?"

Here you have two options:

I prefer to be a warrior and kill monsters by engaging with them face to face

I prefer to be a ranger and kill monsters from a safe distance

If you choose to be warrior smith will give you a pickaxe ask you to start mining so that specialized people in his community make for you a powerful sword.

Smith: "Please take the pickaxe and mine some iron ore to build you a powerful sword"

Marcus: "thank you, I will mine some rocks now".

You will search for the rock nearby and get the iron ore and give it to Smith.

Marcus: "here you go".

Smith: "Thank you, now i will let our specialized people to build the sword for you"

Smith: "Here is your sword please wield it and let us train you to level up your attacking and defending skills"

You will go with Smith and train on some tricks with your sword and train how to defend yourself against attacks.

If you choose to be a ranger smith will give you immediately a bow and arrows and train you on ranged attacks with a professional ranger from his community.

Now you are ready to attack and defend yourself against monsters but you still need food for your energy and health points.

Smith will give you a fishing rod and a fishing net asking you to go fishing.

Smith: "You are a fast learner, now you are ready to fight, but you need some food to fill up your energy and health points. Please take the fishing rod and the fishing net and try to get some fish from the pond nearby".

Take the fishing rod and the fishing net from Smith and go fishing.

You will go and get some fish and give them to Smith.

Marcus: "Here you go".

Smith: "Nice and easy, but it doesn't seem to be so delicious. Let us cook them"

Smith: "Please take the hatchet and cut some logs from the tree closeby."

Marcus took the hatchet from Smith and you must go to the nearby tree and try to cut some logs. After you collect the logs you give them to Smith.

Smith: "Good job Marcus, now get a lighter and try to light up the logs"

Marcus found a lighter on the ground behind a bush. You light up the logs and cook the fish.

Smith: "Now your fish is cooked and ready to eat"

Now you know all the skills and ready to prepare to fight the monsters.

Two Options:

I am done with training let me fight the monsters right now.

I want more training and more preparation to master these skills to fight monsters.

Marcus choose to train and prepare more to master these skills to fight monsters.

If you choose to be done with training you will face monsters and eventually die.

Smith decides to give you more practice and training sessions to be able to defeat monsters easier.

Now Marcus is ready to face problems in the community and have the essential life skills to survive.

Congratulations you are ready now to go online and meet other people to help each other and build your community together.

Gameplay: (online)

Players (you choose whether you are male or female) begin in an open area called the island, where they are taken through a tutorial, a set path where they learn the most basic skills in *Survivors*. At the end of the tutorial, you will be given the essential tools to start with; a sword and a shield, a bow and arrows, a fishing rod and a fishing net, a pickaxe and a hatchet. Players set their own goals and objectives as they play the game. They can train their in-game skills, and engage monsters in combat and complete quests at their discretion. Players interact with each other through trading or chatting. Player will win the game and rescue the world when he masters all quests. However, the game will never be over and there is always room for starting over again and again.

There are 5 skills that you need to train attacking, defending, ranged attacks, mining, fishing and woodcutting. You can use:

- 1- Sword and shield to train your attacking and defending skills.
- 2- Bow and arrows to train your ranged attack skills.
- 3- Fishing rod and fishing net to train your fishing skills.
- 4- Pickaxe to train your mining skills.
- 5- Hatchet to train your woodcutting skills.

Health points:

Every player has a 100% health points. Player loses health points everytime monsters attack him. So cooked fish in your inventory is essential to proceed further. When you lose your 100% health points you will be respawn from the very beginning and end up losing all your items in the inventory and losing 50% of your levels in all skills however items in the bank will still be there.

Skills:

Attacking, defending, and ranging skills:

You can always train this skill by attacking monsters but be careful don't go near huge monsters. Start first with small monsters to level up and when you master this skill it will be easier to defeat huge monsters. Also you should bring with you some food to eat while attacking monsters if you lose health points.

Fishing Skill:

You should use the fishing rod or the fishing net for fishing skill. Fish will increase your health points when you lose some. Also you can sell or trade them to other players as well.

Mining Skill:

Mining is very useful to collect metals and give them to weapon shop so that this shop give you the weapon that you desire. However you can also sell weapons or use them during battles against monsters.

Woodcutting Skill:

Woodcutting is very useful to make fire so you can cook your fish. Also wood logs is essential to build your own house as well.

Quests:

To complete the goal of the game you should complete the following quests:

1- Master All Skills (Max: level 10)

2- Kill all monsters required.

You still can access the game for killing more monsters and offering help to others.
